

Accessibility Compliance:

All new and construction renovations to existing commercial construction projects must comply with the Architectural Barriers Act - Texas Civil Statutes, Article 9102. All construction projects of Total Construction Cost of \$50,000 or more must have the Construction Documents submitted for an accessibility Plan Review not later than twenty (20) business days after the Design Professional "issues" the documents for Construction. All property owners must submit proof that the project has been submitted by receiving an EABPRJ# (the Elimination of Architectural Barriers Project number) to receive a Building Permit.

The Submittal Process:

All Architects / Engineers / Interior Designers / Landscape Architects / Property Owners must submit to a Registered Accessibility Specialist (RAS) the following items:

- A "completed" Architectural Barriers Project Registration form; a copy of the Submission" Form (Original to be sent direct to TDLR-AB / Austin); and, an executed Owner Agent Designation Form for the eventual on-site accessibility inspection;
- An "un-bound" / half-size / hard-copy set of Construction Documents (Working Drawings and Project Manual / Specifications);
- A check for the Plan Review and Site Inspection fees - payable to ARS, PLLC;
- An additional \$175, if ARS is to register project. ARS will then pay the TDLR filing fee by our ARS credit card.
